VOLVO S60

Price and Specification | Model Year 2021 | January 2021

YOUR OWN S60 IS IN REACH

The new S60 celebrates the joy of driving through design. Sculpted sides, a sleek profile and muscular shoulders above the rear wheels highlight the car's athletic character. Scandinavian elegance and dynamic attitude combine to give it a purposeful, focused presence. It is a car that confidently communicates its ability on the road. Distinctive details enhance the powerful character of the new S60 and identify it as one of the new generation of Volvo cars. The prominent front grille wears its Volvo emblem proudly, while the long bonnet and deep front bumper expresses power. Full LED headlights with Volvo Cars' unique T-shaped light signature create an unmistakable presence, day or night. At the rear, the boot edge kicks upwards for a sportier attitude and better aerodynamics at speed.

The new S60 inspires you to drive, with a chassis that strikes a balance between comfort and control. Precise, responsive steering creates a feeling of connection to the road, providing sharp handling and maximum agility. Purity, quality and fitness for purpose are the cornerstones of Scandinavian interior design and the interior of the new S60. Welcome to an uncluttered, inspiring space that invites you to savour the sense of luxury and focus on enjoying the drive.

The sleek centre display touch screen is your intuitive command centre with simple voice control which gives you access to a world of entertainment. Available with a range of features that use the car's connectivity services to make journeys simpler, help you remain connected and enjoy your favourite music on the move.

¹⁾ For best performance and lowest fuel consumption 98 RON is recommended, 95 RON can be used for normal driving.

²⁾ All diesel models are fitted with a particulate filter.

³⁾ The results do not express or imply any guarantee of the fuel consumption of a particular car.

⁴⁾ Official fuel consumption figures are obtained under controlled test conditions and as such consumption achieved on the road will not necessarily accord with the official test results. Factors including driving styles and road, car and weather conditions will also have a bearing on actual fuel consumption achieved.

⁵⁾ Unbraked towing weight must not exceed 50% of kerb weight up to a maximum of 750kg. In temperatures above 30degC the max towing weight should be reduced by 500kg. The customer might under certain driving conditions experience drivability degradation in terms of power and AC performance
