This padded and comfortable harness is attached directly to the car's seat belt by quick link and keeps the dog still in the rear seat. A loose dog is unsafe for both the animal and other passengers in the vehicle. Ideally, a dog cage should be used in the cargo area, but if this is not possible, the Volvo Dog Harness is a good alternative.

The Dog Harness is easy to use and to detach from the seat belt. The flexible design makes it practical and useful even outside the car, for example, as a walking, tracking or pulling harness.

The dog harness is available in four sizes and accommodates dogs from 30 to 132 lbs.
